EDGING COLOUR MATCH

*Let NEY help you
find the perfect
match*

A common mistake many furniture makers make is using edgeworking with a poor quality colour match. This jeopardizes the overall quality of the end product.

At NEY, our highly competent and skilled staff examine and select reputable suppliers for our products.

As a result, quality is always guaranteed. Our staff examine each finished product. Our Edges are accurately matched with the panel surfaces.

NEY use a Pantone® light chamber to ensure match quality

It is possible to choose from smooth, textured, high gloss and wood grain colours.

The standard thickness availability of ABS / PVC is 0.4mm, 0.8mm and 2mm. It is, however possible to produce any thickness from 0.4mm to 3mm, if required.

Colour Match - table of contents.

Application method

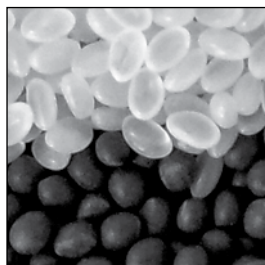

These materials should be applied with a Hot Melt Edgebander.

NEY have over 25 years experience in this field and can advise, supply and install a suitable machine, if required.

Adhesives

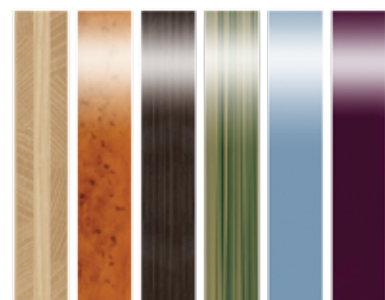

NEY also supply a range of hot melt adhesives. See page 4 for more information.

Finger samples

If you would like a sample of any of our colour range, please do not hesitate to call.
