

NEY - Real Wood Veneers

Stock Species List (May 2015)

Product Information:

Market position:	Used for high quality products.
Ecological information:	Made from renewable resources. Environmentally friendly when incinerated.
Chemical resistance:	Good, depending on lacquer used.
Heat resistance:	High heat resistance, depending on lacquer used.
Heat shrinkage:	Virtually no shrinkage.
Visual features:	Maintains natural character of real wood.
Availability:	Wide range of species.
Main use:	Ideal for real wood effects.
Other features:	Easily applied, low wear and tear on machinery, thin versions available pre-glued.

Real Wood Veneer

Due to modern manufacturing and jointing methods, real wood veneers are available not only in sheet form but also in high quality continuous edging rolls.

Thin Veneer

- Available fleeced or pre-glued.
- Sanded finish, other finishes, e.g. un-sanded or lacquered, are available on request.

Thick Veneer

- Consists of multiple layers of one species real wood veneers throughout.
- Top layer sanded.
- High quality finish on rounded edges.

NB: Veneer products are natural resources and can therefore present differences in shades and grain patterns, this is typical of all species.
